

IT SPECIALIST - OTTAWA

What defines a world leader? Experience in more than 60 countries, global industry and customer respect, and an international reputation in technology and innovation. As a global leader in the field of Air Traffic Control (ATC) and airport infrastructure; Intelcan designs, manufactures, and integrates Communication, Navigation, Surveillance and Air Traffic Management (CNS/ATM) products and solutions. Are you a dynamic team player willing to help us drive success in a fast-paced industry? If so, we want to hear from you.

Intelcan Technosystems Inc. is seeking an independent self-starter to join its Operations Team. As an IT Specialist you will contribute to the delivery and maintenance of technology-based business solutions for our Air Traffic Management (ATM) and Aeronautical Message Handling System (AMHS). You will be skilled in testing, installing, coding, systems integration as well as have strong skills in providing client/user training.

Duties and Responsibilities

- Analyze system requirements
- Create test plans and test procedures
- Perform software testing
- Document test results and support the Programmers resolving the identified issues
- Participate in system integration
- Perform Factory Acceptance Testing (FAT)
- Travel to site for system installation and implementation
- Provide training to client, both in-house and on-site

Qualifications and Requirements

- Computer Science Degree or a combination of post secondary education and a minimum 1 year work experience (co-op experience acceptable)
- Excellent understanding of Operating Systems (OS) and OS behaviour and performance
- Experience debugging stored procedures and functions, detailed testing and following test procedures
- Possess a strong knowledge of various network concepts and architectures, especially MS Windows, Red Hat Linux, Java, MFC, SQL, HTML and PHP
- Good understanding of networking
- Ability to participate in the writing of technical documents (functional specifications, design documents, etc.) considered an asset
- Ability to maintain, modify and repair applications; perform preventive maintenance activities; provide user support considered an asset
- Develop in-house applications, customization and integration with 3rd party applications considered an asset
- Excellent oral and written communication skills with resourceful problem solving abilities
- Proven skills in providing effective client/user training
- Self-motivated to work independently with strong tendencies to be a dynamic team player
- Ability to express verbal and written technical and business issues clearly
- Ability to work in a dynamic environment
- Positive attitude, results oriented, highly motivated and reliable

- Multilingualism would be considered an asset
- Must be able to pass and maintain a security clearance
- Must be willing and able to travel extensively 40+% as required by the phases of the project for extended periods of time to emerging nations such as West Africa and South America

We thank all applicants; however only those selected for an interview will be contacted.
