INTELCAN COMPLETES IMPLEMENTATION OF SKYNAV N8000 ILS SYSTEM IN SUDAN

Intelcan has completed the contract for the supply and installation of its SKYNAV N8000 ILS, for the Khartoum Airport in Sudan. SKYNAV ILS now services Runway 36; restoring the runway to an operational standard.

Intelcan's SKYNAV N8000 ILS system can be configured for Cat I, II or III requirements and flexibility for various applications. SKYNAV ILS is built based on years of experience in various climates over 5 continents. The SKYNAV Product family provides end user advanced features permitting Civil Aviation Authorities to offer the best navigation services at the most affordable cost over the life cycle of the product.

ABOUT INTELCAN

Intelcan Technosystems Inc. is a Canadian CNS/ATM and Airport Infrastructure solution provider. Integrating Intelcan's own products or utilizing those from a diverse supplier network, Intelcan has delivered complete and cost-effective solutions to fulfil client requirements in over 60 countries.

Intelcan delivers airport infrastructure solutions which range from the construction of air traffic control towers to complete airport implementation.

Headquartered in Ottawa Canada since its establishment in 1973 Intelcan has expanded into South Africa, France, Spain, Korea, Cyprus, Bulgaria, Cuba and a research and development facility in Montreal, Canada.

All Intelcan's solutions meet and exceed Eurocontrol and ICAO regulations and are developed under ISO 9001:2008 quality management procedures.
