

What defines a world leader? Experience in more than 60 countries, global industry and customer respect, and an international reputation in technology and innovation. We are a global leader in the field of Air Traffic Control (ATC) and aviation infrastructure. Intelcan designs, manufactures, and integrates Communication, Navigation, Surveillance and Air Traffic Management (CNS/ATM) solutions. We develop airport facilities on a turnkey basis with an emphasis on aviation infrastructure such as terminal buildings and control towers. Are you a dynamic team player willing to help us drive success in a fast-paced industry? If so, we want to hear from you.

Civil Engineer

Intelcan Technosystems Inc. is seeking an independent self-starter to join its Operations Team. As a Civil Engineer, you will plan, design and direct civil engineering projects such as roadways, parking lots and runways, site development for aviation infrastructure as well as grading and storm water management development.

Duties & Responsibilities

- Analyze reports, maps, drawings, blueprints, tests and aerial photographs on soil composition, terrain, hydrological characteristics and other topographical and geological data to plan and design projects
- Calculate cost and determine feasibility of project based on analysis of collected data
- Prepare and direct preparation and modification of reports, specifications, plans, construction schedules, environmental impact studies and designs for project
- Inspect construction site to monitor progress and ensure conformance to engineering plans, specifications, and construction and safety standards
- May direct construction and maintenance activities at project site
- Manage and review the design activities of other structural designers, interact with designers from other engineering disciplines, coordinate the work of sub-consultants in other offices
- May oversee design teams

Qualifications & Requirements

- Bachelors degree in Civil Engineering or Certification as a Professional Engineer and 10 years of project experience in Civil/Structural Engineering Projects (P. Eng. highly preferred)
- Previous experience in executing a major civil, construction or infrastructure contract
- Experience in preparing and reviewing engineering calculations, drawings, and overseeing review of projects in construction
- Excellent decision making skills with evidence of sound technical judgment based on broad training and experience in technology development and manufacturing programs
- Ability to listen effectively and integrate information
- Excellent communications skills including the ability to express verbal and written technical and business issues clearly
- Ability to be a good team leader and member
- Ability to work in a dynamic environment
- Demonstrated capability to multi-task and meet multiple project goals concurrently
- Positive attitude, results oriented, highly motivated and reliable
- Multilingualism would be considered an asset (Eastern European languages)
- Must be able to pass and maintain a security clearance to the NATO Secret level
