

**What defines a world leader?** Experience in more than 60 countries, global industry and customer respect, and an international reputation in technology and innovation. Intelcan is a global leader in the field of Air Traffic Control (ATC) and aviation infrastructure. We manufacture, supply, and integrate Communication, Navigation, Surveillance and Air Traffic Management (CNS/ATM) systems for civilian and military applications. Are you a dynamic team player willing to help us drive success in a fast-paced industry? If so, we want to hear from you.

## **Project Manager**

Intelcan Technosystems Inc. is seeking an energetic Project Manager to be an integral member of its Operations Department. As a Project Manager, you will be involved with all aspects of projects using planning, monitoring and controlling processes.

### Responsibilities

- Project scheduling with respect to implementation and cash flow (determine the optimum delivery of materials in order to minimize inventory time)
- Prepare, control and report on client budget
- Identify and negotiate changes of scope of the contract
- Identify risk - plan and implement risk minimization strategies
- Ensure customer specifications and expectations are met in a timely manner
- Reduce cost deficiencies
- Make cost related and purchasing decisions
- Review and approve subcontractor/supplier invoices and billings
- Act as customer and vendor liaison
- Coordinate in-house integration activities and on-site installation and commissioning
- Ensure ISO 9001:2000 requirements are met and the Project Administration procedure is followed

### Qualifications & Requirements

- Bachelor degree in Civil or Mechanical Engineering (P. Eng highly preferred) or Certification as a Professional Engineer with 8 years of related work experience or the equivalent combination of education and work experience
- Previous experience with airport projects and/or telecommunications
- Proven and demonstrated technical and leadership achievements including attention to scheduling and budgets
- Demonstrated leadership and interpersonal skills with the proven ability to be a good team leader and member
- Excellent decision making skills with evidence of sound technical judgment based on broad training and experience in technology development and manufacturing programs
- Excellent communications skills including the ability to listen effectively and integrate information
- Demonstrated ability to express verbally and written technical and business issues clearly
- Proven ability to work in a dynamic environment and effectively manage project priorities
- Proven organizational and administrative skills
- Demonstrated capability to multi-task and meet multiple project goals concurrently
- Positive attitude, results oriented, highly motivated and reliable
- Fluency in other languages (i.e. French, Spanish, Eastern European) would be an asset
